## Chris Isaak, Life will gone

Broken skies, heartaches that flowers won't mend Say goodbye knowing that this is the end Tender dreams, shadows fall Love too sweet, to recall Dry your eyes, Face the dawn Life will go on All day long thought that we still had a chance Letting go, this is the end of romance Broken hearts find your way Make it through just this day Face the world on your own Life will go on, life will go on There'll be blue skies, every true love Someday I'll hold you again They'll be blue skies in a better world, darlin' Tender dreams, shadows fall Love too sweet, to recall Dry your eyes, Face the dawn Life will go on, life will go on Broken heart find your way Make it through just this day Face the world on your own Life will go on
