

# Chris LeDoux, Country Star

She opened up the letter from Nashville Tennessee  
He said hon they like my music the songs I wrote for you and me  
The boys and me just cut a record and it could hit the charts before too long  
So it's gonna be a while till I can come back home  
Yes I'm gonna be a country star and everyone will know my name  
Oh you know I love those bright lights when I step on stage to sing  
I'll be travlin' round the country with a big bus and a band  
So just keep the homefires burnin' while I'm gone  
And I'll get home when I can

She said hon I hear your record oh they play it everyday  
And everybody really likes it so I guess your on your way  
But darling please remember we all need you here at home  
And the kids all miss their daddy so don't be gone too long  
Yes I know that your a country star and everybody knows your name  
And I know you love those bright lights when you step on stage to sing  
Just remember we all love you and don't get blinded by the light  
We'll just keep the homefires burnin' while you're gone  
You know we pray for you each night

After six long months of goin' I guess the road just finally took its toll  
Cause his songs has lost all meaning and he felt so all alone  
Then one night in Jackson he went out on stage to play  
And the crowd stared at disbelief at the words he had to say  
I don't want to be a country star it ain't the way I thought it'd be  
Well it took me such a long time to know that it ain't the life for me  
Cause the days can get so lonely and the nights can get so long  
Lord I think it's about time this country star went home  
Yes I think that it's about time this country boy went home
