

Chris LeDoux, Don't It Make You Want To Dance

I've been gone for so long,
Feels so good just to get back home,
Back to my friends and other faces that I love to see.
Like a rainbow that is in the sky,
The certain twinkle is in her eye,
Telling me she believes in what I am and what I want to be.

CHORUS

Well don't it make you want to dance
Don't it make you want to smile
When your down, down, down in the country big and sing a while
Don't it make you want to dance
Don't it make you want to smile
When your down, down, down in the country big and sing a while

Oh Lord don't it feel right tonight,
Making music when you feel this right,
Feeling better with every little single song.
Look around everyone is your friend,
And every one is bound to grin,
And when the chorus comes around everybody jump on.

CHORUS x3
