## Chris Rea, Set Me Free

Wake up see the morning light
This is you
This is today
You try so hard to get it right
Can't help thinking somewhere you lost your way
When was the last time
You saw a smile ?
There's a scream on every silent face you see
They're singing set me free

I got a friend Who burns like a fire Says there's only one thing you'll ever know It's out there somewhere Way out on the open road

And me I'm always looking down Down that road out of town Each morning and night You can see me I'm singing set me free Set me free

Goodnight Auberge
I leave you now
You must sleep
While I work the day
Till I return
To dream of you
Through the night
And that free, freeway
