

# Chrissie Hynde, YOU OR NO ONE

This lonely heart's been yearning  
The skies above've been turning  
Feels like the universe just grew,

I've waited for so long  
I've waited for so long.

I just wanna be with you always  
I wanna be around you always  
I just wanna be with you or no one  
Making it you or no one.

And when the night starts falling  
Even the stars are calling  
Spinning and spilling out your name  
Now that's what I call faith  
Spilling out your name  
Forever and ever.

Love is a hurting thing  
It doesn't go away  
Forever is a long time  
To wait for you to say

I just wanna be with you always  
I wanna be around you always  
I just wanna be with you or no one  
Making it you or no one.

Please stay. Never go away.  
Please stay. Never go, never go away.

I just wanna be with you  
I wanna be around you  
I just wanna be with you or no one

You always  
I wanna be around you always  
Just wanna be with you or no one  
Baby, you or no one.

You or no one.  
Every day you or no one.

You or no one.  
You or no one.
