

Christopher Blue, What You Need

Did you really love me?
I think you only thought you did
Are you looking for a man?
Not a one night stand?
Am I a one night stand that lasted too long?
Am I your midnight plan before the morning comes?
Before the morning comes
Am I just what you needed?
Just when you need it?
Here I am coming through for you
And just when you need it I'll fall right through
And just when you need it most
I'll be there to take care of you
When it's time to let you go
I'll do that too
Love the way you love me
Then you treat me you don't
Your lips say you want me
But your body says you won't
You're kisses kill me every time
But you change your mind
Go on change your mind
I am just what you need,
Just when you need it
Here I am coming through for you.
And just when you need it I'll fall right through
And just when you need it most
I'll be there to take care of you
When it's time to let you go
I'll do that too
Well I'm not yours forever
But while we're together
There ain't going to be no nevers
We'll be friends forever
I want you to remember
Here I am coming through for you
And just when you need it I'll fall right through
Just when you need it most
I'll be there to take care of you
When it's time to let you go
I'll do that too
