Chuck Berry, Still Got The Blues

How many times have you heard this song
If I had what he has my blues would be gone
But I got the blues, still got the blues for you

I could have been happy with fortune and fame
I had everything that a poor man could name
I but I still got the blues, I got the blues for you

Searching all over, thinking I'd find
Someone who'd even give me peace of mind
Talking the unknown out of my head
Can't even remember a thing that I said

Give me a chance and take me back
You'll see a change in the way I act
Cause I got the blues, nothing but the blues for you

(Guitar Solo)

Searching all over, and thinking I'd find
Someone who'd even give me peace of mind
Talking the unknown out of my head
Just can't remember a thing that I said

Give me a chance and take me back
And you'll see a change in the way I act
And I won't have the blues, no- no blues
