

# Cinema Bizarre, The Other People

World on the street, I'm driving alone  
And they called my name  
Have all that it takes so catch my flow  
If every day is the same  
I'm giving my love like vertigo  
When you need a change  
I figured you out so long ago

And now the cracks are showing  
Moving closer to you

And we can do anything  
Cause it's so so figures  
That we should be far far away  
From the other people

And we can so fool their lies  
Cause its so so figures  
That we should be long long away  
From the other people

So don't hang around, it starts today  
You don't need a thing  
Just bring on yourself and hit that wave  
Its like angels sing  
Don't shut your mouth, that's what I say  
And we won't let go  
I figured you out so long ago

And now the cracks are showing  
I'm closer to you

And we can do anything  
Cause it's so so figures  
That we should be far far away  
From the other people

And we can so fool their lies  
Cause its so so figures  
That we should be long long away  
From the other people

And we can do anything  
Cause it's so so figures  
That we should be far far away  
From the other people

And we can do anything  
Cause it's so so figures  
That we should be far far away  
From the other people

And we can so fool their lies  
Cause its so so figures  
That we should be long long away  
From the other people

The other people  
The other people
