

# Civil Twilight, Fire Escape

We are the desperate ones, looking for the mark  
We are the lonely ones left out here in the dark  
We bought our tickets but we don't have a seat  
And now we're just slaves to the beat

We are the tired ones, tired of too much sleep  
Tired of searching for the words we can't repeat  
I don't mean to scare you but it's getting too warm  
And I think I'm going to move to the door

We are burning, this is real  
We're on fire but we can't feel a thing  
We were promised more than we could take  
Everybody out it's a fire escape

Gather round my friends, let's try not to pretend  
There is a war between the cold out there and the fire within  
I know that we're alive, I know that we can dive  
Right into the thick of it

I don't want to fill my body with drugs I can't even name  
I'm tired of feeling the same  
I want to feel something  
We are burning, this is real  
We're on fire, don't you feel  
We were made to be more than just awake  
Everybody out it's a fire escape
