

# Clay Crosse, Love One Another Right

We do a pretty good job of throwing sticks and stones  
But everyone's got a closet full of skeleton bones  
No need to tear each other down  
'Cause we're all standing here on common ground

Chorus:

If we could love one another  
We could bring Heaven down out of the sky  
If we could love one another  
We could bring hate to its knees tonight  
Wouldn't every future be bright  
If we could love one another  
Love one another right

We find it easy enough loving the latest trends

Take something that's dead and make it our closet friend  
Imagine what this world could be  
If we worked as hard at loving you and me

Repeat chorus

Bridge:

Don't let your anger get the best of you  
When you're provoked you simply refuse  
Don't waste your time with retribution  
Why not try making a contribution  
Reach down a hand to the tired and weak  
Lift up a soul with the words you speak  
Shake it up with a revolution - and set the world on fire.
