

# Clay Walker, That's Us

(Clay Walker/Tim Mensy)

Sometimes I ignore reality

But baby that's me

I've always been a dreamer

You'd rather face the cold hard truth

But baby that's you, you called it like you see it

Half the time my head's up in the clouds

And you're the only thing that keeps me on the ground

That's us

As different as the night and day

That's us

But the good Lord had planned it that way

That's love

He looked down and knew

A man would need a woman's touch

Two souls come together and make one

That's us

And when I feel I just can't go on

The dreams have come and gone

I know you'll always be there

And when that old cold truth is hard to face

I'll carry you away

Years from now I'll still care

In rockin' chairs we'll share old memories

Made up of part of you and part of me

That's us

As different as the night and day

That's us

But the good Lord had planned it that way

That's love

He looked down and knew

A man would need a woman's touch

Two souls come together and make one

That's us
