

Cliff Richard, Over You

Don't wanna be left behind left alone
Waiting for you to call me
Don't wanna have best of times haunting me
Underlining my heartache
Time heals but only time will tell if time heals
Leaving me free of the hold that you have on me

Over you how can I get
Over you must forget
The things you do
I just must get
Over you live my life again
Without you here

I talk to your answer phone it's telling me
Please leave your number
I'll call when I get back home
When you hear the tone speak up and clearly
Time heals but only time will tell if time heals
But who do I turn to if you won't return my calls

Over you how can I get
Over you must forget
The things you do
I just must get
Over you live my life again
Without you here

I call your home and your answer phone
Tells me leave your number

Over you how can I get
Over you must forget
The things you do
I just must get
Over you live my life again
Without you here

Over you I just must get
Over you but how will I get
Over you I guess I'll get
Over you it may take some time getting
Over you I may never get
Over you just must get
Over you...
