## Cliff Richard, Spider Man

He's the footsteps in the night Shadows gone before the light Never get to see the face Of spider man

Catcing flies just ain't his style
If you're crooked stop think awhile
Once bitten - never the same
He makes a black widow look tame
Spider man

He spins a golden web With a golden thread That never, never let's him down, down, down

And when the spidercatcher comes to town He ain't around

Solo

If you're walking in the park
And hear a shuffling in the dark
Don't stop to give it a glance
You know there's a pretty good chance
It's spider man, spider man
Once bitten never the same
He makes a black widow look tame
Spider man
