

# Clint Black, Galaxy Song

Just remember that you standing  
On a planet that's evolving,  
Revolving at 900 miles an hour.  
It's orbiting at 19 miles a second, so it's reckoned,  
A sun that is the source of all our power.  
The Sun and you and me  
And all the stars that we can see  
Are moving at a million miles a day.  
In an outer spiral orb, at 40,000 miles an hour,  
Of the Galaxy we call the Milky Way.

Our Galaxy itself contains a hundred billion stars.  
It's a 100,000 light years side to side  
It bulges in the middle 16,000 light years thick,  
But out by us it's just 3,000 light years wide.  
We're 30,000 light years from galactic central point.  
We go round every 200,000,000 years.  
And our galaxy is only one of millions of billions  
In this amazing and expanding Universe.

--- Instrumental ---

Our Universe itself keeps on expanding and expanding  
In all of the directions it can whiz  
As fast as it can go, the speed of light you know, 12,000,000 miles a minute,  
And that's the fastest speed there is!  
So, remember when you're feeling very small and insecure  
How amazingly unlikely is your birth.  
And pray that there's intelligent life somewhere up in space,  
'Cause I'm afraid that we've been cheated here on Earth.
