

Clouds, Bubble Baby

Bubble baby, what do you see, the core, the pit, the whole
Of me?

Bubble baby, what do you know, the ins, the outs, what does not show
Between
Below
Behind
Besides all that I want to come in, I've been here so long

Bubble baby, sing it to me one more time, one more time
Please

Blow it up and it over, blow it all in my face
Please
I need
To feel
The pain
The rain
Falling, smell it
P.S. where are you now?

On the other side looking in
From below

Bubble baby, where do you go when the whole world has closed its eyes?
In and out of heaven with the skill of a thousand spies,
Surprise
Surprise

Behind the couch, her eyes
Watching everything you do
Is it me or is it you
On the other side looking in?
Is is love or is it
Sin?
