## Clouds, White Girl

She's blonde
Walking along the sidewalk
Leave a trail of blue and black
Up to you fighting back

Steel chains
A noose of charms on our necks
I find out nothing when we talk and sit
Blue hot passion and watch the set

Easy to fall
Part of your skull
Starts to break away
Cheaters walk
Down the block
Behind this evil street

She's a white girl But I'm living with a white girl She's a white girl But I'm living with a white girl

Nineteen Missing her man for an old girl Drain every beer left over at home Listen to ghosts in the other room

Why not? You're alone inside his keeping Oh, I'll replace your drunk old man Sit in the parking lot and hold your hand

Easy to fall
Part of your skull
Starts to break away
Drunk and in love
Out at a club
Pulling me outside

She's a white girl But I'm living with a white girl She's a white girl But I'm living with a white girl

Easy to fall
Part of your skull
Starts to break away
Drunk and in love
Out at a club
Pulling me outside

She's a white girl But I'm living with a white girl She's a white girl But I'm living with a white girl
