

Cnx Anti-Social, Enter In My Life

Goodnight, It's a pleasure
You just were a girl more
After five minutes
You were someone special
Without talking me, without touching me
Something inside turn me on
In your eyes was becoming late
And I forgot about the time

These days next to you
They taught me that there is really
No determinated time
To start to love
I feel something really deep
That doesn't have any explanation
There is no reason or logic in my heart

Chorus:
Enter in my life, I open the door to you
I know that in your arms there will never be
Lonely nights
Enter in my life, I really love you
I started to miss you
But later I started to need you

Good night, It's a pleasure
Nobody else exist for now
After this time together
I'm not going back
You talked to me, you touched me
And you became my illusion
I want you to be the owner of my heart

Chorus

Enter in my life, save me now
Open your arms and let me in
