

Cold, Ghost In Here

Just get up and go!
No one believed everything was for you
I can't conceive anything that way
Nothin' inside was real 'till I found you
I pulled the sheets and you slipped away
A ghost in here
I can't believe
There's a ghost in here
I can't breathe
You're killin' me
You're killin' me
You're killin' me
You're killin' me
No one believed everything was for you
I can't conceive anything that way
Nothin' inside was real 'till I found you
I pulled the sheets and you slipped away
A ghost in here
I can't believe
There's a ghost in here
I can't sleep
It's taken me
All this time
Fuck you
Just get up and go!
Torch my world
Twist and fade
I don't
Love you
Sold by fate
Twist and change
I don't
Deny
There's a ghost in here (x7)
