Collective Soul, Bearing Witness

Another day newspapers say Life what'd you do to me I'm always here, you're always there Hope that's my company Yeah stars have only so many wishes though They can't tell what we already know See I'm just gathering all my eyes can see through I'm bearing witness to you I'm bearing witness to you Familiar words the evening stirs Life what'd you say to me I'm promised here, you're precious there Love you're my destiny [chorus] Somedays I surrender Somedays I resolve But everyday I'd conquer With your love With you love [chorus]
