

Connie Smith, The Song We Fell In Love To

I just heard, the song we fell in love to
And my heart began to smile, the way it smiles
Each time, I hear, the song we fell in love to
It's a message from the past, that our love will always last

Whenever I'm feelin' down, that song comes hangin' round
And picks me up with happy memories
As time, goes by, more and more I love you
And our friend that tags along, that song, we fell in love to

And when, I hear, the song we fell in love to
All the memories that we've made, are suddenly replayed
Each time, I hear, that melody it thrills me
For it makes me think of you, that song, we fell in love to
