

Continuum, Dream Of A Star

Whenever you're abused, Hopelessly betrayed

Dream of a star, to brighten the night
Giving you hope, guiding your life.

You never know what you could find,
But you will know what you just left behind.

Dream of a star, to light up your sight,
To glow in the dark, to show you were right.

You never know what you could find,
But you will know what you just left behind.

Do it for love, although it's not easy,
Do what you want and give it all you've got.

Dream of a star, to shine on and on.

You never know what you could find,
But you will know what you just left behind.

Do it for love, although it's not easy,
Do what you want and give it all you've got.

Better soon than sorry, Tomorrow's too late.

You did it for love, although it's not easy,
You'll never have to suffer again.
You did it for love, although it's not easy,
You'll never have to feel this pain again.
