

Crash Test Dummies, Little Secret

Just don't tell the things you know
Never show the things you see
Let's keep this little secret with you and me

First come outside here with me
I know it's night, but I can see -
That's right, step out, take my hand
And I'll help to make you understand

Just don't tell the things you know
Never show the things you see
Let's keep this little secret with you and me
Let's keep this little secret with you and me

I like nights when there's no moon
I like suckin' on snakebite wounds
I like thinkin' bout you and me
Twined up in the grass by the apple tree

Just don't tell the things you know
Never show the things you see
Let's keep this little secret with you and me
Let's keep this little secret with you and me

Bite my lip and make it bleed
My heart is running twice the speed
If you wanna know just how I feel
Listen to the sound of my spinnin' wheels

Just don't tell the things you know
Never show the things you see
Let's keep this little secret with you and me
Let's keep this little secret with you and me
