

# Crosby, Stills & Nash, Only Waiting For You

I cannot remember feeling quite so self assured  
It must have been back in my teens  
I was such a basket case when I was young  
It's obviously something that I dreamed

I have always been a most reclusive kind of guy  
When love's around I usually run and hide  
Don't you go believin' I was ever that confused  
I was really only waiting for you

Really only waiting for you  
And what do you suppose that we can do  
Anything whatever that you want to last forever  
Really only waiting for you

And I cannot escape the over-whelming feeling  
Destiny has taken us in hand  
And nothing that we do is gonna change  
The way this love affair is never gonna end

And I know it's hard getting used to the idea  
That your lover wants to be your best friend  
With a showing of affection and a measure of romance  
This is really only waiting for you

Really only waiting for you  
And what do you suppose that we can do  
Anything whatever that you want to last forever  
Really only waiting for you

Waiting, waiting, only waiting for you  
Waiting, waiting, only waiting for you

I've been living by myself I do not want for someone else  
At least that's what I like to say  
And it was working till the other day I met you  
And I fell in love from twenty yards away

I've got one last truly great love left in my life  
And my heart is tellin' me it might be you  
So forget your disappointments I'll forget about my past  
I was really only waiting for you

Really only waiting for you  
And what do you suppose that we can do  
Anything whatever that you want to last forever  
Really only waiting for you

Really only waiting for you  
And what do you suppose that we can do  
Anything whatever that you want to last forever
