

Crush 40, Fuel Me

I can feel you coming up on my heels
Can you feel the thunder behind my wheels?
Just you try to take me
Just you try and take me
I will dust you back right where you came

One way is my way
Your way, don't even try

Feel my fever burning you up inside
Taste my passion, floor you passing by
Eat my bittersweet dust
Hear my roaring fuel thrust
Ain't no way you're ever, ever getting by

One way is my way
Your way, don't even try

All in all, your time is a'running out
You will just leave here without
Running down on the final pace
Run you out into last place
Fuel me, I can't live without

One way is my way
Your way, don't even try

All in all, your time is a'running out
You will just leave here without
Running down on the final pace
Run you out into last place
Fuel me, I can't live without
