

# Crushead, What's Up

May i tell you something about bad blood  
And may i tell you the truth to your face  
Tell me how long you will keep your eyes shut  
Or is the situation an ordinary circumstance  
Why do people still have to live in slums  
When they survive the genocide  
They're dying of disease  
And you still keep on building your new weapons  
And wonder why this world's still so sick

So tell me  
What's in there, what's on your mind  
What's in your soul what's classified  
Say  
What's up, what's up yeah  
What's up what's up

Do you really think that all your tanks and guns  
Will us save from our own self destruction  
I wonder what went wrong in our systems  
That people like you could ever reach the top

So tell me...

You will break  
Awake, awake

So tell me...
