What to do? What to do?
The winding road continues on this point.
Left or right? Right or left?
Which way should I choose? It won't be long

Wake up and spread your eyelids without sleeping
Thighs together. Don't reach your thoughts
A crowded train. Suspense & hope
First, which one's gonna be imposing?

This time you're wishing
The discovered won't be discovered
But your increasing appetite will repeat in suspense

Look out when you're in space spilling tears
It should be changing in the beginning
But if you're walking in the detour
Freely in destinations like that
Don't you worry
'cause you're now improving one step for tomorrow
alright!

What to do? What to do?
The winding road continues on this point.

You're probably sighing to return to the radiance of the landscape scene.
You're not showing a special trick to see courage.

In what unclear way did I abandon to meet the impossible?
I too believe I'm suspecting it myself.

Look out when you're spilling tears even though you wished the amount would reflect
Although destination itself is already dependent, you're still struggling onto the detour.
Is gon' be so right
'Cause you're approaching two steps for tomorrow again
alright!

Left or right? Right or left?
Which way should I choose? It won't be long

Hey, when you consider in the way you're stretching your little chest often
From the rift between clouds, the sun can be seen at the sunny side up north

Hey, if you had thought on the way you stick out your little chest,
in the sunny side, the sun can be seen from rift of the clouds up north

Look out when you're in space spilling tears
It should be changing in the beginning
But if you're walking in the detour
Freely in destinations like that
Look out when you're spilling tears even though you wished the amount would reflect
Although destination itself is already dependent, you're still struggling onto the detour.
Don't you worry
'cause you're now improving one step for tomorrow
alright!

'Cause you're approaching two steps for tomorrow again
alright!
