

Culture Beat, The Hyped Affect

Here we go time to show what we know
Let it flow it's time to get thorough
Born to do this so here I am
Kicking it to a new jam
Join in while I send the bass right through ya
That how I get to Ya
Moving ya, grooving ya, and proving to ya that I know
How to do ya
Come along, can't go wrong, not with this song
It's time to get it on
Can't put it off can't wait no longer
We got to get stronger
Pump this D.J. without delay
Make the people sway
Back and forth and to and fro
To the top we must go
Get busy time so here's a rhyme to help you climb
To a point where you can find what you seek
Reach your peak no time to be chic
I'll make your knees weak
Tough enough I'll call your bluff this jam is rough
Still think you're tough
Can you deal with the thrill do you fit the bill or
Have the will
Power that won't sour at the early hour
If not tell me how are you gonna make it
If you can't take it put up you can't fake it

Fronting time has past show me you can last
Through the final blast of the drum get some it's going on
From now until the early morn

I got more than enough to make you roar
To make you soar
I got more than enough to make you roar
So get on the floor
Got to hang with the thang that does work
Move your body till it hurts
Don't you fret won't you get a little excited
It's to much you can't hide it
Hit the floor don't be a bore
Cause I got more than enough to make you roar
The heat is hot the hot I got to hit the spot
Waste not want not
The joint must jump that's why I pump this new jam
To a level that's in demand
Weaken never just to clever ever to fade
This cut has got it made
Why be shy do or die reach your high
Get a piece of this pie
No regrets you're soak and wet
You're glad we met this is as good as it gets
