

# Dada, Moon

(oohh)

The night before the moon died you realized  
The flowers that you picked  
Ya kept locked away  
Were never to be seen by naked lovers' eyes

The night before the moon died you realized  
The night before the moon died  
You had your chance to make it right

You never did  
You never did, oh no

Take your car right outta gear  
And send it over to the sea  
Touch your fingers to that water  
And put your hands to your face

The night before the moon died you realized  
You lost this one now, girl  
The night before the moon died  
You had your chance to change your mind  
You had your chance to make it right  
You had your chance to save your life

You never did, oh no  
You never did, no no

You never did (no, no, no, no)  
You never did (no, no, no, no)  
You never did, goodbye

No, no, no, no (see you around now, girl)  
No, no, no, no (seen it all before)  
No, no, no, no (life's been blown away)  
No, no, no, no (you finally hit the ground)  
No, no, no, no (there's nothin' left for you)  
No, no, no, no (goodbye, goodbye, yeah)  
hoo, hoo

(solo)

You had your chance to change your mind  
You had your chance to get it right  
You had your chance to save your life  
You never did
