

Danny, If Only You

If only you

If only you

If only you

If only you

If only you

Look were we are falling apart
And nothing seams to mend
This state of you,
This state of me, mmh

Who do you think you're fooling now?
I guess we'll never find it out
Who do you think you fooling now, now?
If only you,
If only you,
Could see that I'm burning,
If only you,
Would know how I'm hurting
All for you, for you, for you
If only you, you, you

If only you

I guess it's all right I keep my head high
You'll never see me cry
Confused over you, better by me, yeah

Who do you think you're fooling now?
I guess we'll just never find it out
Who do you think you fooling now, now?
If only you,
If only you,
Could see that I'm burning,
(Burning baby for you) If only you,
Would know how I'm hurting
All for you, for you, for you
If only you, you, you

If only you, would know me better
If only you, would listen better
If only you, would see me better
If only you, would hear me better
Set me free, before you press delete

If only you,
Could see that I'm burning,
If only you,
Would know how I'm hurting,
All for you, for you, for you

If only you, If only you

If only you, youuu, you, you

Baby it's over you

If only you,
If only you

If only you
