

Darius & Finlay, Destination

When I'm out on the streets of strolling
I can look on the fields of dawn
I can look from the mountainside
And see your fire is still burning with me
And I know (And I know)
So I know (So I know)
I know a place where we can go
Green grass is growing
Chorus:
Baby I don't see you around
(You can't let go)
But you know that my destination
Is on this road going down
'Cause I got to be with you now
Baby I don't see you around
(You can't let go)
But you know that my destination
Is on this road going down
'Cause I got to be with you now
I can feel all the love is in the air
Sweet scent of your presence is everywhere
And I'll never be lost without you
Found your look as you're lighting my way
And I know (And I know)
So I know (So I know)
I know a place where we can go
Green grass is growing
Chorus:
Baby I don't see you around
(You can't let go)
But you know that my destination
Is on this road going down
'Cause I got to be with you now
And on this road I am walking
(And I'm gonna find you)
And I can feel that you're near
(Sense of a getting me)
And when the life is my destination
I know soon you'll be right here with me
Yeah, soon you'll be right here with me
Chorus:
Baby I don't see you around
(You can't let go)
But you know that my destination
Is on this road going down
'Cause I got to be with you now
Baby I don't see you around
(You can't let go)
But you know that my destination
Is on this road going down
'Cause I got to be with you now
