

# Darius, Girl In The Moon

How can I sleep tonight?  
Tell me how mars survived  
Fallen with stars -  
She opened her arms...  
Venus was in my sky.  
How could it pass me by?  
You silently served my time,  
Even thru chains,  
Rust and the rain -  
You pulled away the tide...  
Girl In The Moon,  
I'm half-way there,  
Girl In The Moon,  
I see you everywhere...  
Help me find a way of falling  
Closer to you,  
Girl In The Moon,  
Girl In The Moon...  
How could I weep tonight?  
Touch and tears collide -  
Gravity spins  
Me into your wings,  
And covers me in  
your light...  
[Chorus]  
You're the silent silver  
lining my cloud  
You're the secret flame  
That never burns out,  
Pull away this veil  
And rise into view  
Girl in the moon...  
[Chorus]
