

# Darius Rucker, Never Been Over

We've been good and bad, hot and cold  
And fightin' mad, solid gold  
Been sunny days, straight-line wind  
Been driven slow and guilty as sin

Been back-roads lost and blue-lights found  
Dead of quiet, rock-star loud  
Been up and down like we're built on springs  
We've been a lot of things

But we've never been splittin' up friends, splittin' up records  
Puttin' up walls, burnin' down letters  
Grass is greener 'cause there's something better  
Waitin' down the line

We've never been a headlights-weaving, taillights-fadin'  
So long, move on, goodbye-waitin'  
Never been one last long look across your shoulder  
We've been a lot of things, but we've never been over

We've been two pink lines to up all night  
Brake on the left, gas on the right  
Been 18 years around the sun  
Knowing that day would come

But we've never been splittin' up friends, splittin' up records  
Puttin' up walls, burnin' down letters  
Grass is greener 'cause there's something better  
Waitin' down the line

We've never been a headlights-weaving, taillights-fadin'  
So long, move on, goodbye-waitin'  
Never been one last long look across your shoulder  
We've been a lot of things, but we've never been over

We've been holdin' onto love so long  
That we don't know how to run

But we've never been splittin' up friends, splittin' up records  
Puttin' up walls, burnin' down letters  
Grass is greener 'cause there's something better  
Waitin' down the line

We've never been a headlights-weaving, taillights-fadin'  
So long, move on, goodbye-waitin'  
Never been one last long look across your shoulder  
We've been a lot of things  
We've been a lot of things  
We've been a lot of things, but we've never been over
