Denison Witmer, Steven

This was the first year of our years together Your mother got sick and your sister got married This was the first year of our songs together Simple chords are lovely Simple words are heartfelt

It's the best friends that need you In my case, believe you It's the best friend's lives' kiss you In my case, I'll miss you

You were there on Queen Street when I was feeling down When every word I said felt like it meant nothing The only one I had that understands my blues Is making big predictions of life on the west coast soon

It's the best friends that make you Sometimes they break you It's the best friends that move you In my case, see through you

It's the best friends that need you Sometimes they leave you It's the best friend's lives' kiss you In my case, I'll miss you

It's the best friends that make you Sometimes they break you It's the best friends that move you In my case, see through you

It's the best friends that need you In my case, believe you It's the best friend's lives' kiss you In my case, I'll miss you
