

Depeche Mode, Never Let Me Go

I'm waiting for your love
I know you'll want me
When your body's had enough
Your senses will see
There's only so much time
We have to play with
To waste it is a crime
We have so much to give

When uncertainty parts
You'll be ready to concede
It was plain from the start
You've been running from me
And I have been patient
I have been so calm
Bit my lips through the torment
Please fall into my arms

Never let me go
Never let me go

Watch our dreams unfold in colour
Underneath love's moon, we'll wander

Never let me go
Never let me go

The angels will praise us
The world will seem right
We'll pull it out of the darkness
And into the light
We will be beacons
Shining so bright
Like stars in the darkness
For lovers at night

We will be beacons
Shining so bright
Like stars in the darkness
For lovers at night

Never let me go
Never let me go
Never let me go
Never let me go
