

# Dinosaur Jr., Everybody Lets Me Down

Tales they spun make better days  
Can't explain and I can't stay  
Please just make it go away

Every guy walks down my street  
Any girl they care to meet  
I know there's something out there  
Any time it seemed OK  
Had to wreck it couldn't wait  
I know there's something better.... Oh No?

Everybody lets me down  
All this time I've never found  
Everybody lets me down  
Go outside and look around  
never quite sat on the ground

In a pile I cry I sleep  
In the day the same old heap  
I know there's something out there  
After a while I get worn down  
How much hope am I allowed  
How much is there left out there.... Not much?

Everybody lets me down  
All this time I've never found  
Everybody lets me down  
Go outside and look around  
never quite sat on the ground

Tales they spun make better days  
Can't explain and I can't stay  
Please just make it go away
