## Dinosaur Jr., Water

I saw you down across the water You're floating safely in the way you do Then I scrammed before you saw me I've gotta keep thinking you wanted to By the shoreline, will you be fine? Or will it cover you? And when you taste it, will you embrace it? What will you let it do to you? Grab a look across the water We grab a smile and then you're gone a while With you it'd be across the water When I'm losing it I like your style By the shoreline, will you be fine? Or will it cover you? And when you taste it, will you embrace it? What will you let it do to you?

Come on, baby Drive me out of mind Mind if I come home, along with you And see what you do This is crazy And nothing more I want to See The sea is not the safest place to sit And be so spacy Scary things across the water You'd never know Till they have their way with you You won't catch me dip in the water However much I want to play with you [Solo] Don't stay in long No one's that strong Enough, not to crumble Whenever the water wants you Don't be so crazed I'm just tryin' to save You from losing everything you've got This is no time to rot Don't be fooled by All the coolness rushing by Don't let it grab your mind Pull out now or you will find All you strive for Nothing, gone, no more You're his servant now
