

Dolly Parton, We Might Be In Love

(Dolly Parton)

I love you, I love you
My heart seems to whisper
But my lips cannot form those words
I know my heart
Is calling out to you
In a voice you've already heard

Does your heart feel as if
It could burst any second
Is it racing, will not slow up
Do you just want to be
With me endlessly
Well I'm thinking
We might be in love

We might be in love
The best I can tell
I thinkin' thoughts
That I've never pondered
And I'm feeling like I've never felt

It's like I drink
From some magic posion

Sipping from your loving cup
Intoxicated, infatuated
I'm thinking we might be in love

We might be in love
What else could it be
These feelings of wonder
Passion and romance
Excitement and pure ectasy

We might be in love
And it might be forever
I think there's a future for us
If you just want to be
In and all over me
It might be, we might be in love

I promise for keeps
If you're feeling like me
Then it might be
We might be in love
I dare say
We might be in love
