

Donell Jones, I Wanna Luv You

I wanna love you
Every night every day
You know I need you
In my life you stay
I wanna love you
Every night every day
You know I need you
In my life you stay

You are the reason why I live ummm
I never found joy I can't contain(yeah)
Found myself thinking bout your love ummm
Its a feeling I get only my heart can explain
You know what

I wanna love you
Every night every day
You know I need you
In my life you stay
I wanna love you
Every night every day
You know I need you
In my life you stay

I never felt so deep in love
I think it's because you touched a special part of me(babe)
Hope I'm the one your thinking of
You must be feeling the same as I do
This meaning love without you(lady lady)

Girl I think about you every day
Hoping you'll never go away
Its so special what we have to share
Seems all I need is tender love and care
Girl I think about you every night
See a dinner and a candle light
Soon my love would be all you need
We'll be together for eternity

I wanna love you
Every night every day
I wanna need you
In my life you stay
I wanna love you
Every night every day

I'm loving I'm loving you baby
Gonna say it one more time
I'm loving I'm loving you baby
I'm loving you baby
Said I'm loving I'm loving you baby
I'm loving you baby

I wanna love you
Every night every day
I wanna need you
In my life you stay
I wanna love you
Every night every day
I wanna need you
In my life you stay
