

Dopamine, Lose Your Place

Feel me creeping up your spine
eating up your time
Crawl into the air
I can feel the warmth, heating me today

Fall until, you can't feel
Taking whats unreal for you, break it from the inside

I see you take the easy line, lose your place, your mind
Fake all you had, what you need to see
What do you want to be?

Fall until, you can't feel
Taking whats unreal for you, break it from the inside

Wanting people to listen you can't just tap them on the shoulder anymore
You have to hit them with a sledge hammer
And then you'll notice you've got their strict attention
I'm not special, i've never been exceptional - this is though
