

Dope, Revolution

It's our time
To make a stand
You and me one by one
Up against the man
It's about time
To understand
You and me, we're the ones
With the upper hand

Revolution
Can you hear me
This is our time
Revolution
Are you with me
It's about time

It's our time
Where here to stay
It's begun everyone better fuckin pray
It's about time
Were not afraid
One by one by the gun
Now your gonna pay

I think it's our time for

Revolution
Can you hear me
This is our time
Revolution
Are you with me
It's about time

Our whole life we've felt the upper hand of the man
Who was born into the wealth of this sytematic fuckin scam
And never had the ability to ever fucking understand
Or the patience or the courage or the strength to withstand god damn
The weight of the world is on the shoulders of the man who can
But that's the way it is and it's the way it's always fucking been
Forever and ever since this cold black world began
Ruled by greed and by pocrisy and the superficial mind fuck again

Revolution
