

# Dottie West, Don't Say A Word

Don't say a word just kiss me kiss me kiss me (for soon we must part)

We only have a little time you're feeling sad I can tell

I know my love what's on your mind my heart is breaking as well

But darling don't say a word just give me give me give me all the love you can give

And let your heart be with me with me with me as long as you live

[ strings ]

Don't say a word just kiss me kiss me kiss me for soon we must part

And when you're gone please miss me miss me miss me with all of your heart
