

Down To Earth Approach, We're Sleeping

You are young
We watch ourselves grow older every day
We all know what we want
Looking back all the times
You never thought much anything
And I don't care that it's over
We're sleeping but we're better off awake
Just say when, and I will listen, always
Keep your eyes on the road, and keep your head to the ground
"Cause we're a quarter dear already
And already I'm tired
Thinking back all the times
You never thought much anything
And I don't care that it's over
