

Dr. Feelgood, Going Some Place Else

(Larry Wallis)

I go to the kitchen
You go to the hall
I say meet in springtime baby
You say wait till fall

You're always going some place else
You're always going some place else

I'll say baby
Let me take you to the stars
I'm up here on the moon
You're over there on Mars

You're always going some place else
You're always going some place else
I don't want to spend my life
Talking to myself
Why must you always be going some place else

I'm climbin' mountains
While you go under ground
I look in the country
Baby you're out in the town
You're always going some place else
You're always going some place else

I go to the races

The day you go to church
I call in a private eye
And you call off the search

You're always going some place else
You're always going some place else
I don't want to spend my life
Walking by myself
Why must you always be going some place else

- guitar solo -

You're at the Riviera
And me I'm up the creek
I'm playing solitaire
You're dancing cheek to cheek
Going some place else
You're always going some place else

I gotta see you baby
No matter what the cost
Just as I start closing in
That's when our lines get crossed
You're always going some place else
You're always going some place else
I don't want to spend my life
Walking by myself
Why must you always be going some place else
