

# Dragonforce, Fury Of The Storm

We are riding for the battle field in force tonight  
Fury of the darkest evil cry for war  
Far beyond the boundaries of hell and starlight  
On the road to lands unknown forever more

Through the caverns far below our quest will lead us  
Onwards through the ice and snow forever more  
Standing fighting full of hate the time has come now  
Stand and sound the guns of glory cry for war

On wings of glory we will carry on  
Far across the forgotten lands toward the distant sun  
And in the darkness shining far beyond the starlight  
Lightning is striking from the dark dawning shadows  
And in the kingdom of the everlasting sun  
When the glory of the master's time has come

Into the fires of forever we will fly through the heavens  
With the power of the universe we stand strong together  
Through the force of power, it will soon reach the hour  
For victory we ride, Fury of the Storm!

We are the chosen ones we cannot fail now  
Spilling all the blood on the fires below  
Smashing through the boundaries with the fire and fury  
Killing all the mortals down the winding road

Hell fires are raging the storm growing strong  
On the path to victory towards the distant sun  
And in the darkness shining far beyond the starlight  
Lightning is striking from the dark dawning shadows  
And in the kingdom of the everlasting sun  
When the glory of the master's time has come

Into the fires of forever we will fly through the heavens  
With the power of the universe we stand strong together  
Through the force of power, it will soon reach the hour  
For victory we ride, Fury of the Storm!
