

# Dri, Acid Rain

Will our children look back  
With hatred or despair  
At a generation of idiots  
Who just didn't care  
About the fossil fuel fumes  
And the aerosol sprays  
That put holes in the ozone  
And let in the rays  
That can cause cancer in humans?  
And what is it all worth  
Heating up our globe  
Destroying our own Earth?  
What will they think  
Of us with no concern  
About the seas of shit  
And radiation burn?  
We who watched  
The waters of the world  
Turn to lakes of lava  
Killing every form of life?  
Will they have regrets  
For being born at all  
Into a world where only  
Acid rain can fall  
On all the empty fields  
And on the vacant lots  
Where cockroaches and crab grass  
Are the only crops?  
Acid rain dissolving away  
The monuments of man  
Run for your lives!

Acid rain  
Smell the rain coming?  
Acid rain  
Run for cover now!  
Acid rain  
The water is on fire!  
Acid rain
