

Dropline, Fly Away From Here (Graduation Day)

Sun comes up then goes away
So does Graduation Day
You did your walk of fame and that was it
She turns to me like we're alone
Inside a secret telephone
Says the words that no one else can hear

She said I paid attention to myself
I found that I was someone else
Once a child and now I've grown within
So I'm packing on these golden years
I let them go without a tear
I let them go and this is what she said
She said to me

She said
I believe that everyone can fly, away from here
She said
I believe that everyone can fly, away

Celebration through the night
Circle round this fire light
I guess this pack of wolves will pass for friends
Saying who's that coming up to me?
Hope and opportunity
You better grab it fast, grab it fast, and hope it never ends

I said I believe that everyone can fly, away from here
She said I believe that everyone can fly away

Oh this whisper, said whisper it, but I feel it
Oh if day is night then night is day
Which one took your love away?
Which one will you use?
Which one will you use?
Who's that coming up to me?
Hope and opportunity
You better grab it fast
Grab it fast and hope, hope

I said I believe that everyone can fly, away from here
She said I, I believe that everyone can fly away
She said I, I believe that everyone can fly away from here
She said I, I believe that everyone can fly away.
