

Duncan James, Frequency

Looking at you, looking at me
The signs you give out are so hard to read
When I get close you pull away from me
We used to talk on the phone
Now when I call
There's nobody home
Drifting like a satellite
So far away

[Chorus]
How can I tune into your frequency
Don't you let the signal die on me
I'm reaching out for you to come
back to me oh
Come on let's talk about it
Must be a way around it
Don't disconnect from me

Feeling my way in the dark
Finding the thread that leads to your heart
What did I do what have I done
To hurt you
Something in the atmosphere
I can't get through

[Chorus]
How can I tune into your frequency
Don't you let the signal die on me
I'm reaching out for you to come
back to me oh
Come on let's talk about it
Must be a way around it
Don't disconnect from me

Yeah
Don't disconnect from me
Oh Yeah
Something in the atmosphere
I can't get through

[Chorus]
How can I tune into your frequency
Don't you let the signal die on me
I'm reaching out for you to come
back to me oh
Come on let's talk about it
Must be a way around it
Don't disconnect from me

Come on let's about it
Must be a way around it
Don't disconnect from me [2x]
From me
