

Duran Duran, Seven And The Ragged Tiger

(lebon, rhodes, taylor, taylor, taylor)

You told me once a second chance was not worth waiting for
A million chances later, you don't know how right you were
Don't mean you don't dream cause the beating on the door
The russian high who needs to die begins to realise
That all those days in mischief have your soul in paradise
I don't know that those time that you were foolish and unwise
And I've seen all reason hit the floor

I don't need no reservations
But I can do things that I've never done before
Playing with a fire ball you can't touch
But you can soar with seven and the ragged tiger (2x)

Like the morning wild warning
Fires are alive, don't have a choice
The danger boys are hoping for a fight it seems
I can't bleed I don't dance anymore
All armed with superstition 'til the birds have flocked our way

Somebody ought to tell them we don't care what people say
Not afraid don't believe in those stories anymore
They just hang their victims to the wall

At least tell me something
It seems that their vision has something within their law
Brother can you feel the heart inside
You're running for your life
You're running seven and the ragged tiger (4x)

All happy like a rainy day is everything to gain
Just the smell of independence he defends his life again
Don't mean I don't dream in no music anymore
Cause I've heard those reasons die before
Oh please tell me something
It seems their vision has something within
Brother can you feel the heart inside
You're running for your life
You better seven and the ragged tiger
