

Dust For Life, Dragonfly

So stare into the sun
The fields are turning blue
It's clear to everyone
Who you've been talking to

Go on refuse to dream
Cold world of endless need
My little dragonfly
On dark wings you come to me

Waiting for the sun to shine
Waiting for the light to find
And it's taking all I know
To give it up and let it go

No truth I can explain
No sense in talking to
Flames take another one
I see I'm smoking too

Go on refuse to see
In dark clouds the ravens weep
My little dragonfly
On dark wings you come to me

Chorus (x3)
