## Dusty Springfield, I've Got A Good Thing

(Jerry Ragavoy / Mort Shuman)

I got a good thing I got a good thing I got a good thing going

Take the sun and take the moon And stars that shine so bright All I need is my guy And everything's all right

Everything about him thrills me The way he looks at me just kills me He's got a way of getting to me Every kiss just goes right through me

I got a good thing You know I got a good thing, baby I got a good thing going

Take the rainbow from the sky Oh, I don't really care I will have a pot of gold As long as he is there

I never knew such sweet affection And it's all in my direction If he left there's no mistaking My poor heart would start to break and

I got a good thing You know I got a good thing going I got a good thing going, yeah

I got a good thing, yeah You know I got a good thing going You know I got a sweet thing baby Everything is everything, baby Everything is uptight, all right, out of sight Yeah, I got a good thing going, yeah You know I got a good thing
